

1 General information

We carefully designed your artificial window product so that you can use it for a long time with minimal maintenance.

Warranty period: 3 years

Expected lifespan: 10+ years

Expected lifespan with renewed spare parts: 30+ years

We do the following to maximize the lifespan of our product.

1- We keep the electric current passing through LED chips below the maximum limit. Thus, LED chips work efficiently and have a long life.

2- We select more power supply capacity and quality according to the electricity consumption of the product. For example; For a product that draws 5 Amperes of current, we ensure its long life by using a power supply with a capacity of 8.5A instead of 5A.

List of spare parts that must be replaced in case of malfunction to extend the lifespan

*LED *Driver *Printing

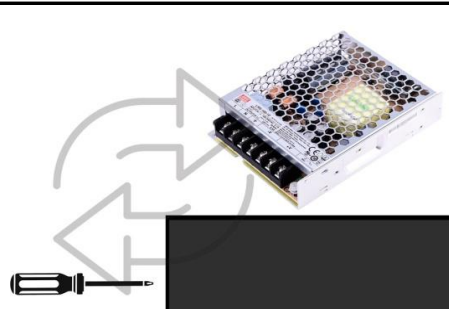

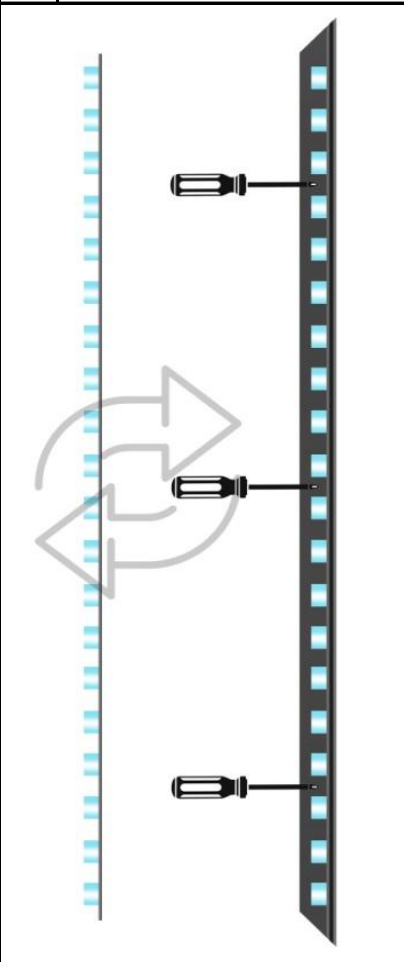

Apart from these, the remaining structure will maintain its durability for a long, long time since it is made of metal.

2 Spare parts supply

While designing the product, we chose universal components so that our users can easily access spare parts.

Thus, when you need any spare parts, you can use spare parts that you can obtain from our company, our dealers near you or any electrical and lighting stores.

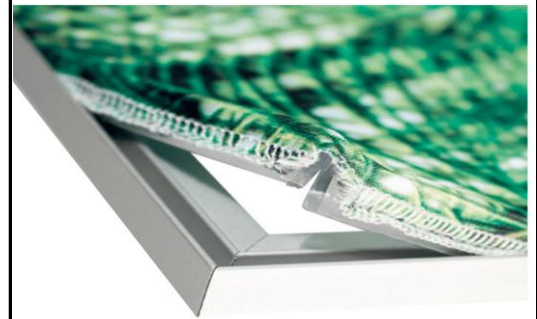

3 Renewal

You can easily replace the driver and LED by removing the screws with a screwdriver. Additionally, if you have chosen an optional remote control and dimmer, this spare part can be renewed by removing it from the control box.

4 Replacing printing

You can change the image in seconds with the silicone strips on the edges of the image. You can also use different landscapes in this renovation.

5 Cleaning

You can clean the display surface and edge profiles with a damp and soft cloth.
